Model MX450 Single Ramp

Model MX450D Dual Ramp

Tilt & Roll Wheelchair Scale with Handrail

This versatile scale can be used as a wheelchair, handrail, or chair scale. Single ramp can be mounted on either side, while the dual ramp version allows for pass-through weighing. The ramps also fold up for use as a stand-on scale.

The standard, integrated handrail can be grasped by patients while still providing an accurate measurement. The scale features Befour's proprietary MotionLock Technology which automatically calculates the weight of the most unsteady patients. It's alkaline battery power provides years of use and allows the scale to be used anywhere.

FEATURES/SPECIFICATIONS

Generous platform size: 28" x 32" platform accommodates most wheelchairs.

Integrated Handrail: Patient's weight is accurately calculated even when using the handrail.

"Tilt & Roll" Design: Always ready to move to another location.

MotionLock Technology: Accurate weight even with an unsteady user.

LB/KG Lockout: Quickly change setup to disable LB/KG button so scale will only weigh in selected unit of measure.

Pivoting Console: Pivots 320° for optimal viewing.

To move, simply tilt the scale back on its large 4" wheels, roll to the new location and the scale is immediately ready for use. The scale fits through all standard doorways.
